

Substance Use in Your Workplace

First Draft Script

Replace ADDICTED with
STRUGGLING

Today, over 20 million Americans struggle with addiction to alcohol, pain medication, marijuana and other substances.

75% of those ~~addicted~~ are employed.

A recent National Safety Council survey shows seven in ten workplaces are affected by prescription drug misuse.

And while most employers know the health risks, few think about the toll it can have on business.

Absenteeism, increased healthcare expenses and lower productivity can all hit your business hard and damage your bottom line.

The good news is, by taking some simple steps, you can make a big difference.

Employers who take action are more confident and better prepared to address substance use by employees.

For every employee you help with their substance use disorder your company can save more than \$3,200 annually.
